

**Amendments to the Specification:**

Please amend the specification as follows:

Please replace first full paragraph on page 8, starts at line 7, with the following rewritten paragraph:

Preferred drugs include selegiline, nitroglycerin, nicotine, ciclopirox olamine, tolbuterol, propanolol, bupranolol, arecolin, methamphetamin, ethosuximide, melproic acid, prilocaine, dyclonine, valproic acid and ~~amphetaminil~~ amphetamine. An especially preferred drug is selegiline. Mixtures of more than one drug can also be used according to the present invention. The second drug need not be one that is normally liquid at or about room temperatures.
